PROFESSIONAL SUMMARY

Software Development Lead and Technical Lead with 15+ years of full life cycle software development experience across enterprise applications, distributed systems, integrations, and cloud-enabled platforms. Applies AI daily as a force multiplier — building agentic workflows that auto-assign support tickets by learning from historical data, AI-powered API performance dashboards, and internal tools that automate manual support, hiring, and team-development processes. Strong background in .NET, C#, ASP.NET Core, .NET 6, .NET Core, Entity Framework, SQL Server, T-SQL, REST APIs, microservices, OAuth/JWT authentication, Azure DevOps, CI/CD, Agile/Scrum delivery, stakeholder management, team mentoring, and technical roadmap planning.

CORE COMPETENCIES

AI and Automation: Agentic AI Workflows, LLM Integration, Model Context Protocol (MCP), AI Agents and Subagents, Agent Skills, Prompt Engineering, AI-Assisted Development (Claude Code), Intelligent Ticket Routing and Classification, AI-Powered Dashboards and Analytics

Programming Languages: C#, JavaScript

Frameworks and Libraries: ASP.NET, ASP.NET Core, .NET 6, .NET Core 3.1, MVC, Web API, Entity Framework, LINQ, Dependency Injection, ADO.NET, SignalR, jQuery, Bootstrap

Architecture and APIs: Microservices, RESTful APIs, gRPC, Swagger/OpenAPI, OAuth, JWT, Single Sign-On (SSO), Windows Services, TCP/IP Socket Programming, Redis, RabbitMQ

Databases: Microsoft SQL Server, SQL, T-SQL, Stored Procedures, Triggers, MySQL, MongoDB

Cloud Platforms: Microsoft Azure, Amazon Web Services (AWS)

DevOps, Platforms, and Tools: Azure DevOps, CI/CD Pipelines, Docker, Kubernetes, Hangfire, Git, SVN, Microsoft IIS, Visual Studio, Crystal Reports

Integrations and Administration: Active Directory, LDAP, Piwik, LimeSurvey, Botpress, HTML, XML, XSL, application deployment, production troubleshooting

Methodologies and Testing: Agile, Scrum, SDLC, TDD, Unit Testing, NUnit, MSTest

Leadership and Management: Technical Roadmap Planning, Stakeholder Management, Cross-functional Collaboration, Code Reviews, Team Mentoring, Project Delivery, Client Support, Requirement Analysis

WORK EXPERIENCE

Software Development Lead / Technical Lead | Eva Pharma | Cairo, Egypt | 05/2022 - Present

- Promoted to Development Lead, overseeing a team of 9 developers and driving the technical roadmap for enterprise software initiatives.
- Built AI Agentic workflows that auto-assign support tickets to the most suitable technician, trained on historical tickets and self-improving from corrections, eliminating manual triage.
- Developed an AI-assisted support tool that automates repetitive ticket-handling tasks previously done manually, reducing handling time and standardizing resolution quality across the support team.

- Created AI-powered dashboards for API performance analysis, enabling real-time visibility and proactive follow-up on service health.
- Designed internal applications supporting the hiring and promotion process, tracking each team member's progress and self-development goals to drive objective, data-backed career decisions.
- Continuously research emerging AI concepts — MCP, agent Skills, agentic workflows, and subagents — and coach the team on applying them in daily work.
- Spearheaded adoption of Azure DevOps CI/CD pipelines, achieving a 20% improvement in project delivery efficiency across cross-functional teams.
- Mentored and coached 9 junior and mid-level developers, contributing to a 30% increase in overall team productivity through structured code reviews and knowledge sharing.
- Developed scalable, enterprise-grade applications using Agile/Scrum methodologies, delivering a 15% reduction in time-to-market.
- Modernized legacy codebases by integrating RESTful APIs, OAuth/JWT authentication, Redis caching, and Swagger/OpenAPI documentation.
- Designed and implemented database schemas using Entity Framework and LINQ, improving data retrieval performance by 25%.
- Led stakeholder management and cross-functional collaboration with product, QA, and infrastructure teams to align delivery with business objectives.
- Delivered backend features for the Medsulto physician content platform using .NET 6, C#, Windows Services, SQL Server, stored procedures, Git, and team code reviews.

Senior Software Engineer | Going Infinity | Alexandria, Egypt | 11/2021 - 04/2022

- Led end-to-end development of a Warehouse Control System (WCS) using .NET Framework 4.6.2, increasing warehouse operational efficiency by 20%.
- Architected a server-client model using TCP/IP socket connections with thread-safe access, ensuring reliable communication and data integrity.
- Implemented CI/CD workflows and managed version control using Git, enabling efficient collaboration across distributed teams.
- Reduced post-deployment defects by 15% through comprehensive unit testing using MSTest and Test-Driven Development (TDD) practices.
- Built and deployed backend services with .NET Framework, C#, Windows Services, SQL Server, stored procedures, and environment-specific release packages.

Software Engineering Team Lead | Premitek | Alexandria, Egypt | 04/2017 - 11/2021

- Directed all phases of the Software Development Life Cycle (SDLC), delivering multiple projects on time and within budget through strong stakeholder management.
- Owned the technical roadmap, designed reusable software modules and RESTful API integrations, improving development efficiency across the team.
- Authored analytical reports on user and technical requirements, guiding project prioritization and resource allocation decisions.
- Managed user feedback, bug tracking, and client escalations, achieving a 20% reduction in customer-reported issues.
- Administered and optimized the company web portal using Hangfire for background job scheduling, maintaining uninterrupted service delivery.

- Led delivery of the NABD Customer Support Software SaaS complaint-management platform, supporting workflow automation, issue tracking, client escalations, IIS administration, and production support.

Senior Software Engineer | Premitek | Alexandria, Egypt | 01/2014 - 03/2017

- Built responsive front-end interfaces using ASP.NET, Bootstrap, and jQuery, ensuring cross-browser and cross-device compatibility.
- Established RESTful web services and Windows services documented with Swagger/OpenAPI, enabling seamless system integration and data exchange.
- Integrated enterprise applications with Active Directory (AD), LDAP, and OAuth/JWT-based access control policies.
- Deployed and delivered applications for KBANK in Thailand, meeting international client requirements and strict deadlines.
- Developed Respect Command Center (RCC) and Respect unified Communication Center (uCC) modules using ASP.NET, C#, MVC, Bootstrap, Web Services, Windows Services, SQL Server, SVN, and Crystal Reports.

Junior Software Engineer | Kiva Group | Texas, USA (Remote) | 08/2010 - 12/2013

- Contributed to coding, design, and testing phases in cross-functional Agile teams, delivering high-quality software on schedule.
- Developed a Single Sign-On (SSO) system for the Respect unified Sales and Service Management (uSSM) platform using OAuth/JWT, streamlining user authentication and access management across multiple applications.
- Integrated Altitude Script Language (ASL) with Respect Service Bus (RSB) using RabbitMQ-style messaging, enabling efficient inter-application communication and data exchange.
- Designed and optimized database schemas and stored procedures using SQL Server, improving data storage and query efficiency.
- Generated business intelligence reports using Crystal Reports to support data-driven decision-making for stakeholders.
- Built and maintained KivaSupport ticketing features for capturing, tracking, testing, and deploying support tickets across the organization.

EDUCATION

Bachelor of Engineering: Computers and Systems

Alexandria University, Egypt | 2006 - 2010

CERTIFICATIONS

- OOP Principles - Java 2 OOAD Using UML (09/2007)
- Intelligent Information and Cloud Computing (12/2010)
- Data Science, Big Data Analytics and AI Applications for Data-Driven Digital Transformation (10/2019)
- The Art of Communication (08/2022)
- ABC Supervisor Training - EVA Pharma, People Development (06/2026)
