PROFESSIONAL SUMMARY

Results-driven Software Development Lead and Technical Lead with 12+ years of full life cycle software development experience. Proficient in .NET, C#, ASP.NET Core, Entity Framework, and SQL Server. Proven track record of leading cross-functional engineering teams, driving stakeholder management, implementing CI/CD pipelines, and delivering scalable microservices-based applications on time and within budget. Experienced in Agile/Scrum methodologies, cloud platforms (Azure, AWS), OAuth/JWT authentication, RESTful API design, and technical roadmap planning.

CORE COMPETENCIES

Programming Languages: C#, JavaScript

Frameworks & Libraries: ASP.NET, ASP.NET Core, MVC, Web API, Entity Framework, LINQ, SignalR, jQuery, Bootstrap

Architecture & APIs: Microservices, RESTful APIs, gRPC, Swagger/OpenAPI, OAuth, JWT, Single Sign-On (SSO), Redis, RabbitMQ

Databases: MS SQL Server, MySQL, MongoDB

Cloud Platforms: Microsoft Azure, Amazon Web Services (AWS)

DevOps & CI/CD: Azure DevOps, CI/CD Pipelines, Docker, Kubernetes, Hangfire, Git, SVN

Methodologies & Testing: Agile, Scrum, SDLC, TDD, Unit Testing (NUnit, MSTest)

Leadership & Management: Technical Roadmap Planning, Stakeholder Management, Cross-functional Collaboration, Team Mentoring, Project Delivery

WORK EXPERIENCE

Software Development Lead | Technical Lead | *Eva Pharma* | *Cairo, Egypt* | 05/2022 – Present

- Promoted to Development Lead, overseeing a team of 9 developers and driving the technical roadmap for enterprise software initiatives.
- Spearheaded adoption of Azure DevOps CI/CD pipelines, achieving a 20% improvement in project delivery efficiency across cross-functional teams.
- Mentored and coached 9 junior and mid-level developers, contributing to a 30% increase in overall team productivity through structured code reviews and knowledge sharing.
- Developed scalable, enterprise-grade applications using Agile/Scrum methodologies, delivering a 15% reduction in time-to-market.
- Modernized legacy codebases by integrating RESTful APIs, OAuth/JWT authentication, Redis caching, and Swagger/OpenAPI documentation.
- Designed and implemented database schemas using Entity Framework and LINQ, improving data retrieval performance by 25%.
- Led stakeholder management and cross-functional collaboration with product, QA, and infrastructure teams to align delivery with business objectives.

Senior Software Engineer | *Going Infinity* | *Alexandria, Egypt* | 11/2021 – 04/2022

- Led end-to-end development of a Warehouse Control System (WCS) using .NET Framework 4.6.2, increasing warehouse operational efficiency by 20%.
- Architected a Server-Client model using TCP/IP socket connections with thread-safe access, ensuring reliable communication and data integrity.
- Implemented CI/CD workflows and managed version control using Git, enabling efficient collaboration across distributed teams.
- Reduced post-deployment defects by 15% through comprehensive unit testing using MSTest and Test-Driven Development (TDD) practices.

Software Engineering Team Lead | *Premitek* | *Alexandria, Egypt* | 04/2017 – 11/2021

- Directed all phases of the Software Development Life Cycle (SDLC), delivering multiple projects on time and within budget through strong stakeholder management.
- Owned the technical roadmap, designed reusable software modules and RESTful API integrations, improving development efficiency across the team.
- Authored analytical reports on user and technical requirements, guiding project prioritization and resource allocation decisions.
- Managed user feedback, bug tracking, and client escalations, achieving a 20% reduction in customer-reported issues.
- Administered and optimized the company web portal using Hangfire for background job scheduling, maintaining uninterrupted service delivery.

Senior Software Engineer | *Premitek* | *Alexandria, Egypt* | 01/2014 – 03/2017

- Built responsive front-end interfaces using ASP.NET, Bootstrap, and jQuery, ensuring cross-browser and cross-device compatibility.
- Established RESTful web services and Windows services documented with Swagger/OpenAPI, enabling seamless system integration and data exchange.
- Integrated enterprise applications with Active Directory (AD) and implemented OAuth/JWT-based access control policies.
- Deployed and delivered applications for KBANK (Thailand), meeting international client requirements and strict deadlines.

Junior Software Engineer | *Kiva Group* | *Texas, USA (Remote)* | 08/2010 – 12/2013

- Contributed to coding, design, and testing phases in cross-functional Agile teams, delivering high-quality software on schedule.
- Developed a Single Sign-On (SSO) system using OAuth/JWT, streamlining user authentication and access management across multiple applications.
- Integrated ASL with Respect Service Bus (RSB) using RabbitMQ-style messaging, enabling efficient inter-application communication and data exchange.
- Designed and optimized database schemas and stored procedures using SQL Server, improving data storage and query efficiency.
- Generated business intelligence reports using Crystal Reports to support data-driven decision-making for stakeholders.

EDUCATION

Bachelor of Engineering: Computers and Systems

Alexandria University, Egypt | 2006 – 2010

CERTIFICATIONS

- OOP Principles – Java 2 OOAD Using UML (09/2007)
- Intelligent Information and Cloud Computing (12/2010)
- Data Science, Big Data Analytics & AI Applications for Data-Driven Digital Transformation (10/2019)
- The Art of Communication (08/2022)

LANGUAGES

Arabic (Native) | English (Professional)
